Experience

Melonbp | Remote

Lead Project Designer | 05/2023 - 05/2024

- Designed and produced 4 published marketplace projects, with several still in development when I left.
- Facilitated interdisciplinary communication to ensure blocking issues were resolved quickly and efficiently.
- Used Notion to create detailed project designs, split by discipline so individual tasks could be assigned.
- Engaged with our production pipeline at every junction, ensuring collaboration, quality, and vision follow through.

Honeyfrost | Remote

Contract Designer | 2 Projects | 2023

- Designed a user-friendly lobby, cosmetic, and multiplayer-integrated leaderboard system for an unreleased parkour map.
- Contributed to a large-scale java modpack recreation project design document. Design included several bosses, procedurally generated structures, questlines, custom item sets, NPC's, and cutscenes.

Ziax Ltd (Cubecraft) | Remote

Behavior Designer & Developer | 08/2021 - 07/2022

- Designed and developed 5 of 7 mythical-themed bosses for a large project. Work included a behavior framework for state-based multi-staged boss entities, unique boss attacks, and integrated particles.
- Worked closely with artists and builders to ensure quality implementation of features across multiple projects.

Feed The Beast Ltd | Remote

Function, Behavior Designer & Developer | 02/2020 - 06/2021

- Designed and implemented mechanics and functions for Egghunt RTX by FTB for NVIDIA. Features worked on include multiple minigames, puzzles, and general world mechanics.
- Designed and implemented minigames and world mechanics for Dome Disaster by FTB.

MCKids Academy | Vancouver, Canada

Camp Counsellor, Server Administrator, Content Creator | 06/2018 - 08/2021

- Maintained and updated a rotating slate of private servers.
- Designed and implemented events, minigames, and custom mechanics catered to the given demographic of each server.

Charity Work

Love Tropics | Remote Volunteer

Organiser, Minigame Designer, Builder | 2017 - Present

- Designed and implemented several minigames aimed at large player counts (15+). Some were developed with functions by myself, and others using our proprietary data-driven mod-based minigame engine.
- Designed ‘care’ and ‘sabotage’ packages, purchasable by viewers live, via donations, to ensure impact to gameplay was fun and exciting, and drove further donations.
- Instrumental in the success of the 48 hour live event, with the total amount raised currently standing at \$250,000 USD
- Managed the 6+ person minigame build team for the past two years.
